Dear Editor

I have revised my paper, and rewrite the similar word/sentences. I have checked my similarity paper and it becomes 26%. The remaining words/sentences are general terms or words that can not be replaced because related to the concept of the variable in general, such as Cronbach's alpha, reliability, etc.

I attach the current results of the similarity checked of my paper (I used Ithenticate program), and also my revise paper to IJSTR. I hope this can be accepted.

Best regards

Triantoro safaria
